Inspirational notes

This soundset tries to do what FURY-800 does best. Rather than making an all-purpose toolbox, the aim is to make the synthesizer shine at its A-game. I remember the original Korg POLY-800 for its soft pads and polysounds as well as its bells and noisy attacks. All together, that makes it a highly personal soundset, reflecting how I want to use the FURY-800.

All sounds are made with usability in mind. Explore it, play it and tweak it!

64 patches in 9 categories.

The spirit of this project is completely non-profit. It's all up for free. A tag or mention is always welcome if you find it usable. Love from Copenhagen!

Christoffer, January 30th 2022, version 1.0
